TRANSPARENT TINTS: ALL COLORS

Dura Technologies. The materials in this product are chosen for their compatibility with unsaturated polyester coatings.

Application:

- 1. Prior to use, determine the loading requirements for the specific application.**
- 2. The tints should be added to the material under gentle agitation.**
- 3. Mix the resin system for approximately 5 minutes before adding the tints.**
- 4. For more information, refer to the SDS.**

WARNING:

This material can affect the gel time and the viscosity of the resin system. Please evaluate this material thoroughly before using it in production.

Our Products are intended for sale to industrial and commercial customers. We request that Customers inspect and test our products before use and satisfy themselves as to contents and suitability. Nothing herein shall constitute a warranty, expressed or implied, including any warranty or merchantability or fitness, nor is protection from any law of patent to be inferred. All patent rights are reserved. The exclusive remedy for all proven claims is replacement of our materials and in no event shall we be liable for special, incidental or consequential damages
