Pigment Color Selection Guide Disclaimer

Due to monitor settings, monitor pixel definitions, limitations of desktop scanners, digital photography, and dye lot variations, we cannot guarantee that the color you see on your screen as an exact color of the product. We strive to make our colors as accurate as possible, but screen images are intended as a guide only and should not be regarded as absolutely correct. All colors are approximations of actual colors. For best results, view this page with your color depth set to 16-bit (thousands of colors) or higher. Revchem Composites can guide you to pigments that meet your needs and can supply samples if your project requires you to see, touch, and evaluate the fine pigment distinction and quality, first hand.
